

Traffic reports on XM radio are invaluable to me as I commute 54 miles each way, 5 days per week and I must be able to plan alternate routes if there is a traffic problem on my normal route. Living in northern New Jersey and working in southern New Jersey I can not get accurate traffic reports on the major commercial radio stations as they mostly cater to the New York traffic situations. I also think being able to tune into local traffic reports when I am traveling on vacation will be a great asset. I choose to pay for XM radio each month because it gives me these added benefits. Please do not take them away from me.
